What we do at Byers Green...

We take e-safety very seriously.

We talk about being safe online.

We celebrate Safer Internet Day.

We subscribe to Hector's World. We just need to click on his icon to go to a safe website.

We have e-safety bands, which we designed ourselves, to wear and remind us to be SAFE and smart!

We have all made a pledge to be safe online.

If you have any questions or concerns, do not hesitate to approach Mr. Kirtley, Miss Dodds or your class teacher.

E-Safety Policy

What is E-Safety?

E-safety means electronic safety. Lots of people have devices which connect to the internet such as laptops, mobile phones, tablets and games consoles. E-safety is important to keep us safe so we can communicate, browse, explore and have fun online.

Why the Internet is good:

- **You can learn lots of things and use it for research and school work.**

- **You can play games.**

- **You can stay in touch with friends and family who maybe don't live close by.**

Some dangers include:

- **Cyberbullying**

- **Bad Language**

- **Inappropriate Content Online**

- **Stranger Danger**

- **Viruses**

If people online are mean or worry me:

What should I do?

- Tell an adult I trust straight away.

- Stay calm and report what has happened.

- Keep messages for evidence.

- Block and delete the person.

- Do not keep it to myself.

- Do not be unkind back.

- Do not arrange to meet anyone.

People I can tell:

Family

Friends

Teachers

PCSO or the Police

Remember to be:

S — Keep **safe** by being careful not to give out personal information when you're chatting or posting online. Personal information includes your email address, phone number and password.

m — **Meeting** someone you have only been in touch with online can be dangerous. Only do so with your parents' permission and only when they can be present. Remember online friends are still strangers even if you have been talking to them for a while.

a — **Accepting** emails, IM messages, or opening files, images or texts from people you don't know or trust can lead to problems – they may contain viruses or nasty messages!

r — Someone online might lie about who they are and information on the internet may not be true. Always check information is **reliable** by looking at other websites or in books. If you like chatting online it's best to chat to your real world friends & family.

t — **Tell** a parent, carer or a trusted adult if someone, or something, makes you feel uncomfortable or worried, or if you or someone you know is being bullied online.
