

### **Class 3 - Y3 and Y4**

LO: To predict which materials will be insulators and which will be conductors.

Read the information about conductors and insulators.

Unfortunately, we are unable to carry out the practical experiment today but instead I would like you to make a prediction about each material and write whether you think it will conduct or insulate electricity.

Please write a definition for conductor and insulator.

Can you think of 3 other conducting materials and 3 insulating materials.
