

Hello Class 4! We are almost at the end of our first week of maths already! You have all worked so hard this week and I am very proud of you.

Today we are learning about cube numbers.

A cube number is the product of a number multiplied by itself three times.

$$1 \times 1 \times 1 = 1$$

$$2 \times 2 \times 2 = 8$$

Can you find the cube numbers up to  $10 \times 10 \times 10$ ? Use strategies to help you calculate the answers. Good luck and remember I am here to help at any time.
