

For this week's spellings, we are looking at words that are created by adding the suffix '-**ity**'.

Can you spot the '-**ity**' suffix word in this sentence?

Baking cakes and biscuits was Nadine's **speciality**.

For this week's spellings, we are looking at words that are created by adding the suffix '-**ity**'.

Can you spot the '-**ity**' suffix word in this sentence?

The **majority** of the people polled voted for the Red Party.

speciality

majority

What kind of words have we created when the **'-ity'** suffix has been added?

They are both **nouns**

speciality

majority

What kind of root words was the ‘**-ity**’ suffix added to?

‘special’ and ‘major’ are both adjectives

The ‘**-ity**’ suffix usually changes adjectives into nouns.

'Special' and **'major'** are easy root words to add the **'-ity'** suffix to because they don't change.

special + ity = speciality

major + ity = majority

But do **all** root words behave this way?

How do **'active'**, **'sensitive'** and **'captive'** change when they become nouns?

active → activity

captive → captivity

sensitive → sensitivity

When the -ity suffix is added, the 'e' from the end of adjectives usually disappears.

Does this always happen?

How do '**active**', '**sensitive**' and '**captive**' change when they become nouns?

flexible → flexibility

able → ability

visible → visibility

possible → possibility

When the suffix is added, the '**le**' from the end of adjectives usually disappears and is replaced by '**-ility**'.

Can you think of any other nouns where this happens?

Which word didn't belong in a group?

curious → curiosity

What's happened to the root word?

'**Curiosity**' is an exception to the usual rules and a word that you must learn to spell as it is a Y5/Y6 statutory spelling word.
