

3.3.21 LO: To explain how different sounds travel.

Draw the sound waves traveling to the ear.

Loud Sound

Quiet Sound

Fill in the missing words:

When you hit the drum, the drum skin This makes the particles to the drum start to as well. The vibrations to the next air particles.

This carries on until the air particles to your pass the vibrations into your ear.

Once in your ear the travel into the until they reach the and you hear the sound.
