

# Thursday

## Geography

Today you are going to find out about tectonic plates.

I would like you to read through the information for today and complete the worksheet linked to tectonic plates by answering the questions and labelling the plates on the map.

As an extra activity I have included some Oreo biscuits in your pack. I would like you to use them to show the movement of the tectonic plates and photograph the different stages. Please don't forget to send photos by email so we can display the photos in the classroom.

Of course once the task has been completed you can enjoy eating them!
