## Angles on a Straight Line

## Aim

- I can recognise angles on a straight line and find missing angles.

## Success Criteria

- I know that angles on a straight line total $180^{\circ}$.
- I can find missing angles on a straight line.

## Angles on a Straight Line

A straight angle measures $180^{\circ}$.

## Angles on a Straight Line

We can use these the known fact that angles on a straight line total $180^{\circ}$ to help us calculate missing angles.

## Angle Calculations

## Angle Calculations

## Angle Calculations

$$
A=87^{\circ}
$$

$$
A=87^{\circ}
$$

## Angle Calculations

## $A=32^{\circ}$

$$
A=22^{\circ}
$$
