

## Properties of circles!

Cut out the circles on the other sheet. Find the radius and diameter.

| Circles | Radius (cm) | Diameter (cm) |
|---------|-------------|---------------|
| A       |             |               |
| B       |             |               |
| C       |             |               |
| D       |             |               |
| E       |             |               |

What do you notice about the radius and the diameter?

So if a circle has a radius of 20cm, what is the diameter?

So if a circle has a diameter of 56cm, what is the radius?

If a tiny circle has a radius of 0.243cm, what is the diameter?
